1st requirement:-

Route: **http://innowity.com/greentrends/api/otp-send.php**

Request Method: **POST**

Request Body:

```
{
"cell": "9600123456"
}
```

Response body: (2 cases)
case 1: success
```
{
   "data": {
     "message": "OTP sent successfully"
   }
}
```
Case 2: Input cell number invalid (not 10 digits or empty or not starting with 6/7/8/9)
```
{
    "error": {
        "code": 400,
        "message": "Phone number is invalid"
    }
}
```

2nd Requirement:-

Route: **http://innowity.com/greentrends/api/otp-verify.php**

Request Method: **POST**

Request Body:
```
{
    "otp": "1234",
    "cell": "9300930093",
    "salon_id":"1",
    "fcmID": "4asdgas45a6sd"
}
```
Response: (3 cases)
Case 1: Existing user
```
{
    "data": {
        "isNewUser": false,
        "x-auth-token": "f728816ce17012a2feb05c46b87d9767",
        "userDetails": {
            "fname": "UWT",
            "lname": "Velachery",
            "cell": "9500950095",
            "salon_id": "1",
            "age_group": "21-30",
            "gender": "female",
            "email": "SVBALA99@GMAIL.COM",
```

```
                "dp_url": "image website link",
                "referral_code": "848c433ce0",
                "beauty_points": "0"
            }
        }
    }

Case 2: New User
{
    "data": {
        "isNewUser": true
    }
}

Case 3: OTP not correct
{
    "error": {
        "code": 401,
        "message": "Unauthorized"
    }
}
```

3rd Requirement:-
Route: **http://innowity.com/greentrends/api/update-profile.php**
Request Method: **PUT**
Request Header:
```
{
    "x-auth-token": "5d315ce6cf24f" //obtained in step 2
}
```

Request Body:
```
{
    "userDetails": {
        "fname": "sasi",
        "lname": "kumar",
        "cell": "9600960096",
        "age_group": "91-30",
        "gender": "male",
        "email": "sasi@GMAIL.COM",
        "dp_url": "image website link"
    }
}
```

Response: (3 cases) -> Case 1: Success
```
{
    "data": {
        "message": "Profile Updated successfully",
        "userDetails": {
            "fname": "sasi",
            "lname": "kumar",
            "cell": "9600960096",
            "age_group": "91-30",
            "gender": "male",
```

```
                "email": "sasi@GMAIL.COM",
                "dp_url": "image website link",
                "referral_code": "79923888fd",
                "beauty_points": "0",
                "salon_id": "1"
        }
}
```

Case 2: Input format not correct
```
{
   "error": {
     "code": 400,
     "message": "Inputs which you provided are not correct"
   }
}
```

Case 3: Invalid x-auth-token
```
{
    "error": {
        "code": 401,
        "message": "Unauthorized"
    }
}
```

4th requirement:-
Route: **http://innowity.com/greentrends/api/services.php?gender=male**
//or female

Request Method: **GET**
Request Header:-
```
{
      "x-auth-token": "adfandhosih3826"
}
```
//obtained in step 2
Response body: (2 cases)
==case 1: success (Shows services available only at his salon)==
```
{
    "data": {
        "categories": [

            "points": "5"
        }
    ]
}
```

Case 2: auth token invalid
```
{
  "error": {
    "code": 401,
    "message": "Unauthorized"
  }
}
```

6th requirement:-
Route: **http://innowity.com/greentrends/api/add-cart-item.php**

Request Method: **POST**

Request Header:-
```
{
     "x-auth-token": "327f241d71833306e836f0fa733eaaaf"
}
```

Request Body:-
```
{
    "service_id":4
}
```
//now, service id 1 to 16 assigned for salon_id 1, 17 to 32 for salon_id 2
Response body: (4 cases)
case 1: success (if that service is available at user's salon branch)
```
{
    "data": {
        "message": "service ID: 4 is added to cart for user ID: 3"
    }
}
```
Case 2: error (if that service is not available at user's salon branch)
```
{
    "error": {
        "code": 404,
        "message": "service ID: 17 is not available at user's location"
    }
}
```

Case 3: Already added
```
{
    "error": {
        "code": 400,
       "message": "service ID: 4 is already added in the cart for user ID: 3"
    }
}
```

```
{
    "error": {
        "code": 400,
        "message": "The given Service ID is invalid"
    }
}
```

Case 5: Service ID empty or any alphabets given
```
{
    "error": {
        "code": 400,
        "message": "Input is invalid"
    }
}
```

7th requirement:-

Route: **http://innowity.com/greentrends/api/delete-cart-item.php**

Request Method: **DELETE**

Request Header:-
```
{
      "x-auth-token": "327f241d71833306e836f0fa733eaaaf"
}
```

Request Body:-
```
{
    "service_id":4 //got in step 4
}
```

Response body: (3 cases)

case 1: success
```
{
    "data": {
        "message": "service ID: 2 is deleted from the cart for user ID: 3"
    }
}
```

Case 2: Already deleted
```
{
    "error": {
        "code": 400,
        "message": "service ID: 2 is not present in the cart for user ID: 3 "
    }
}
```

Case 3: Invalid service ID
```
{
    "error": {
        "code": 400,
        "message": "The given Service ID is invalid"
    }
}
```

8th Requirement:-

Route: **http://innowity.com/greentrends/api/view-cart.php**

Request Method: **GET**

Request Header:-
```
{
      "x-auth-token": "327f241d71833306e836f0fa733eaaaf"
}
```

Response body:-

Case 1: Success
```
{
    "data": {
        "user_id": "19485",
        "cart_items": [
            {
                "service_id": "3",
                "name": "Full Arms",
```

```
                        "min_price": "660",
                        "max_price": "795"
                },
                {

                        "service_id": "1",
                        "name": "Face",
                        "min_price": "150",
                        "max_price": "180"
                },
                {

                        "service_id": "4",
                        "name": "Full Body",
                        "min_price": "2785",
                        "max_price": "3345"
                }
            ]
        }
}
```

Case 2: Invalid Auth token or Empty token

```
{
    "error": {
        "code": 401,
        "message": "Unauthorized"
    }    }
```

9th Requirement:-

Route: **http://innowity.com/greentrends/api/view-bookings.php?status=1 (or 2 or 3)**

Request Method: **GET**

Request Header:-

```
{
     "x-auth-token": " 3e3e336bb51650b126ff869ce76ebff6"
}
```

Response body:-

Case 1: status = 1 (Booking requested by user)

```
{
    "data": {
        "bookings:": [
            {
